STAND
EXPO FLOOR **ON**®

- PORTABLE FLOOR
- NO TOOLS NEEDED
- PERFECT FOR GRAPHICS
- UNIQUE FOR CABLES

HOW DOES THE SYSTEM WORK

Easy to install without tools and compact for transport and storage!

Place the tiles together and attach them with the connector. The tiles have now become self-supporting, so the appearance is always sleek and beautiful, even with uneven floors!

The basic tiles are stackable. Just like a lego brick, the tiles are stacked.

The tiles take up minimal space which ensures compact transport. It also prevents the tiles from sliding.

Carpet tiles

With the stand-on floor, you have unprecedented possibilities. Basically you can use the Stand-ON floor as a raised floor and cover it with standard carpet tiles, laminate wood or any other material, edging with aluminium profiles or sloping tiles. But with our cover plates, you can design a complete new look and feel. These cover plates are available in clear and white.

The clear ones are designed to put a thin printed sheet inside the plate. Now the print is visual from above and you can change them at any time. Thanks to the strong cover plates of the Stand-ON system, your print remains protected and therefore reusable. This is the affordable way of making exciting floors. We call it flexible expression that generates more visitors, more leads and more profit.

The white cover plates, printed with UV ink is the new way to design the perfect floor, it looks better than the real!! Print Marble, Stone, Wood, Carpet, Metal, Leather, Concrete or any other desired material, for sure it is nicer, lighter, more durable and easier to handle!

BENEFITS

- Lightweight raised floor
- Easily placed without tools
- In ABS or in ABS V0 = Fire-retardant, self-extinguishing, and certified
- Connect on top side and selfsupporting
- Electrical cables or led strips can be embedded both on the bottom and the top
- Stack tiles into each other (Lego principle, nestable)
- Can take heavily loads, 900 kg per tile, tiles do not bend
- Tiles 50 x 50 cm, for indoor and outdoor use
- Sustainable, Cradle to Cradle
- Can be expanded modularly
- Cheap and low depreciation
- Safe = Non-slip, no sharp edges, always flat
- Transparent cover plate
- Cover plate can be printed in every colour or full-colour
- Stacking cover plates alternately, two plates fit into each other
- Exchangeable photo prints
- Compact to transport
- A new look on every fair
- Can be combined with upholstery or floor tiles
- Finishing edges and finishing corners with cable duct in same colour as tiles
- Easy to clean
- 5-year warranty
- Dutch Design and produced in the Netherlands.
- PCT/NL2018/050683
